DCR-WEB Ultrasonic Web Controller

- Controller optimized for web applications
- 2 line x 8 character LCD display and keypad for easy programming
- Programmable filtering
- Programmable drive speed and ramp control
- Isolated 0-10 VDC output for drive control with invert switch (other outputs available)

- (2) Programmable 5 A dry contact relays used to activate alarms
- Perfect for roll-diameter and loop control applications

Options

- Electrostatic or ceramic transducers

Operational Description

The DCR-WEB is an ultrasonic position control system designed for the demands of web control applications.

The DCR-WEB operates on the principle of “time of flight” measurement of an ultrasonic signal generated by the transducer.

The DCR-WEB transducer can be either an electrostatic sensor for clean environments or a ceramic piezo sensor for harsh industrial environments. A variety of transducer mounting configurations are available (see dimensional drawings and ordering information for details).

The DCR-WEB controller utilizes microprocessor intelligence to allow filtering of the return signal to discriminate the desired target from unwanted false echoes and ambient noise. The controller specifically rejects difficult-to-filter noises from broad spectrum sources such as pneumatic valves and cylinders. The controller program is designed specifically to offer programmable features desired by engineers controlling web tension and roll diameter in their industrial processes.
Applications

The DCR-WEB is designed to provide a direct interface and control signal to many types of drives used to control tension and speed on industrial web processes. The web material can be metal, plastic, paper, rubber, glass, or any other extruded or formed rolling stock. The sensor is not sensitive to changes in color, reflectiveness or web temperature, as are other sensor technologies. Ultrasonic sensors require no contact with the rolling stock and cannot damage or degrade the product.
■ Controller Specifications

Performance
- **Range:**
  - Electrostatic (DCR-1047, DCR-1057) — 6 to 120 in. (15 to 300 cm)
  - Ceramic (DCR-2017, DCR-2067) — 12 to 120 in. (30 to 300 cm)
- **Digital Inputs:** Invert Switch (analog output), Program Switch (save two program settings)
- **Digital Outputs:** Relay: (2) programmable; Isolated to 1500 Vrms; (2) SPST - 5 A @ 250 VAC
- **Analog Outputs:** 0-10 VDC isolated
- **Electrical:** Isolation exceeds 2500 Vrms
- **Resolution:** 0.1 in. (2.54 mm)
- **Accuracy:** ±0.25% of range
- **Repeatability:** 0.05% of full scale
- **Sample Rate:** 40 to 120 msec, programmable
- **Display:** 2 lines x 8 char. LCD alphanumeric
- **Adjustments:** 4 button key pad – mode up, mode down, number up and number down
- **Temperature Compensation:** Internal, enabled with ceramic transducers

Electrical
- **Supply Voltage:**
  - AC — 100/120/200/240 VAC; 50/60 Hz.
  - DC — 10–30 VDC
- **Total Current Draw:** 50 mA max

Physical
- **Sensor Connector:** coaxial “F” connector
- **Electrical Connector:** terminal strips
- **Material:** PVC housing with Screw Cover
- **Dimensions, Overall:** 7.0 x 7.0 x 3.0 in. (178 x 178 x 75 mm)
- **Rating:** IP65/NEMA 4X
- **Mounting:** Surface by means of (4) screws
- **Weight:** 2 lb. approximately

Environmental
- **Operating Temperature:** 32 to 140°F (0 to 60°C)
- **Maximum Pressure:** 15 psig at 68°F (20°C)

Specifications are subject to change without notice.

■ Transducer Specifications

Sensor: Electrostatic or Ceramic Piezo
- **Range:**
  - Electrostatic (DCR-1047, DCR-1057) — 6 to 120 in. (15 to 300 cm)
  - Ceramic (DCR-2017, DCR-2067) — 12 to 120 in. (30 to 300 cm)
- **Material:**
  - Electrostatic: Stainless Steel and Gold Kapton® Film
  - Ceramic: ABS or PVC
- **Dimensions:**
  - Electrostatic: 3.5 x 2.5 x 1.5 in. (89 x 64 x 38 mm)
  - Ceramic: 3 x 2 in. dia. (76 x 51 mm dia.)
- **Rating:**
  - Electrostatic (DCR-1047, DCR-1057) — NEMA 12
  - Ceramic (DCR-2017, DCR-2067) — NEMA 4X
- **Mounting:**
  - Electrostatic: (2) screw flange
  - Ceramic: (4) screw flange or 2 NPT
- **Operating Temperature:** -4 to 140°F (-20 to 60°C)
- **Maximum Pressure:** 20 psig at 68°F (20°C)
- **Weight:**
  - Electrostatic (DCR-1047, DCR-1057) — 0.5 lb. (0.2 kg) approximately
  - Ceramic (DCR-2017, DCR-2067) — 1.0 lb. (0.45 kg) approximately

Specifications are subject to change without notice.

■ Wiring

![Wiring Diagram]
### Dimensions — in./mm

**Controller**
- 7.00 in. (177.8 mm)

**DCR-1047 Electrostatic, Back-Mount Housing**
- 3.00 in. (76.2 mm)
- 2.60 in. (66.0 mm)
- 2.50 in. (63.5 mm)
- 1.00 in. (25.4 mm)

**DCR-1057 Electrostatic, Front-Mount Housing**
- 3.50 in. (88.9 mm)

**DCR-2017 Ceramic Surface-Mount Housing**
- 3.00 in. (76.2 mm)

**DCR-2067 Ceramic, NPT Housing**
- 3.75 in. (95.3 mm)
