Hammer Union 1502 Fitting Recalibratable Incoloy Pressure Transmitter
Series: HU1502I

The Hammer Union 1502 Fitting Recalibratable Incoloy Pressure Transmitter is designed for the rugged environments of land-based and offshore drilling installations, including Mud Logging and Measurement While Drilling. The incoloy wetted material is NACE compliant and suitable for sour gases. And the recalibration port allows for digital zero and span setting. With all that, and Class I, Div 1 Intrinsically Safe certification, the HU1502I delivers accurate measurements in the most adverse conditions.
