Thank You

Thanks for purchasing an MPI series magnetostrictive level sensor from us! We appreciate your business and your trust. Please take a moment to familiarize yourself with the product and this manual before installation. If you have any questions, at any time, don’t hesitate to call us at 888-525-7300.

Scan the QR code to the right to see the full user manual on your tablet or smartphone. Or visit www.apgsensors.com/support to find it on our website.

1. Description
The MPI series magnetostrictive level sensor provides highly accurate and repeatable level readings in a wide variety of liquid level measurement applications. It is certified for installation in Class I, Division 1, and Class I, Zone 0 hazardous areas in the US and Canada by CSA, and ATEX and IECEx for Europe and the rest of the world.

2. How To Read Your Label
Each label comes with a full model number, a part number, and a serial number. The model number for the MPI will look something like this:

SAMPLE: MPI-RS-2Y-PSSA-120-4D-N

The model number correlates with all the configurable options and tells you exactly what you have. Compare the model number to the options on the datasheet to identify your exact configuration. You can also call us with the model, part, or the serial number and we can help you.

You’ll also find all hazardous certification information on the label.

3. Warranty
This product is covered by APG’s warranty to be free from defects in material and workmanship under normal use and service of the product for 24 months. For a full explanation of our Warranty, please contact Technical Support to receive a Return Material Authorization before shipping your product back.

Scan the QR code below to read the full explanation of our Warranty on your tablet or smartphone.

4. Dimensions

### MPI-E Chemical Housing Dimensions

```
<table>
<thead>
<tr>
<th>Dimension</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diameter</td>
<td>1.25”</td>
</tr>
<tr>
<td>Depth</td>
<td>4.92”</td>
</tr>
<tr>
<td>Width</td>
<td>2.44”</td>
</tr>
<tr>
<td>Height</td>
<td>5.00”</td>
</tr>
</tbody>
</table>
```

Note: For dual dimensions, large housing dimensions are above small housing dimensions.

### MPI-E Housing Dimensions

```
<table>
<thead>
<tr>
<th>Dimension</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diameter</td>
<td>1.25”</td>
</tr>
<tr>
<td>Depth</td>
<td>4.92”</td>
</tr>
<tr>
<td>Width</td>
<td>2.44”</td>
</tr>
<tr>
<td>Height</td>
<td>5.00”</td>
</tr>
</tbody>
</table>
```

Note: For dual dimensions, large housing dimensions are above small housing dimensions.

### MPI-R Housing Dimensions

```
<table>
<thead>
<tr>
<th>Dimension</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diameter</td>
<td>1.25”</td>
</tr>
<tr>
<td>Depth</td>
<td>5.71”</td>
</tr>
<tr>
<td>Width</td>
<td>2.00”</td>
</tr>
<tr>
<td>Height</td>
<td>5.00”</td>
</tr>
</tbody>
</table>
```

Note: For dual dimensions, large housing dimensions are above small housing dimensions.

5. Installation Guidelines & Instructions

#### MPI Magnetostrictive Level Sensors

**Installation Guide**

For MPI-E, MPI-E Chemical, and MPI-R Intrinsically Safe

#### Installation Guidelines & Instructions

The MPI should be installed in an area—indoors or outdoors—which meets the following conditions:

- Ambient temperature between -40°F and 185°F (-40°C to 85°C)
- Relative humidity up to 100%
- Altitude up to 2000 meters (6560 feet)
- IEC-664-1 Conductive Pollution Degree 1 or 2
- IEC 61010-1 Measurement Category II
- No chemical corrosive to stainless steel (such as NH₄, SO₂, O₂, etc.) (Not applicable to plastic-type stem options)
- Ample space for maintenance and inspection

Additional care must be taken to ensure:

- The probe is located away from strong magnetic fields, such as those produced by motors, transformers, solenoids, etc.
- The medium is free from metallic substances and other foreign matter.
- The probe is not exposed to excessive vibration.
- The floats fit through the mounting hole. If the float(s) does/do not fit, it/they must be mounted on the stem from inside the vessel being monitored.
- The float(s) is/are oriented properly on the stem (See Figure 5.1 below). MPI-E floats will be mounted on the stem from inside the vessel being monitored.

**Warning!**

- The probe is susceptible to thermal expansion when the process temperature exceeds 73°F / 23°C. This expansion can be calculated as follows: Expansion = (Max Process - 73°F) / 23°C

**Figure 5.1**

**Taper**

**UP**

**Reference**

**Zero Reference**

**IMPORTANT:** Floats must be oriented properly on the stem, or sensor readings will be inaccurate and unreliable. Untapered floats will have a sticker or etching indicating the top of the float. Remove sticker prior to use.

**ATEX Stated Conditions of Use:**

- Under certain extreme circumstances, the non-metallic parts incorporated in the enclosure of this equipment may generate an ignition-capable level of electrostatic charge. Therefore the equipment shall not be installed in a location where the external conditions are conducive to the build-up of electrostatic charge on such surfaces. In addition, the equipment shall only be cleaned with a damp cloth.
- The enclosure is manufactured from Aluminum. In rare cases, ignition sources due to impact and friction sparks could occur. This shall be considered during installation.

**Installation Instructions:**

- Remove the housing cover of your MPI.
- Feed system wires into MPI through conduit openings. Fittings must be UL/CSA Listed for CSA installation and IP65 Rated or better.
- Connect wires to MPI terminals. Use crimped ferrules on wires, if possible.
- Replace housing cover.

See Sensor and System Wiring Diagrams (section 6) for Modbus wiring examples.

The MPI series magnetostrictive level sensor provides highly accurate and repeatable level readings in a wide variety of liquid level measurement applications. It is certified for installation in Class I, Division 1, and Class I, Zone 0 hazardous areas in the US and Canada by CSA, and ATEX and IECEx for Europe and the rest of the world.

MRI-E/R Intrinsically Safe Modbus System Wiring

MRI-E/R Intrinsically Safe Modbus System Wiring with RST-6001

1 IMPORTANT: Refer to section 9 for Hazardous Location Wiring

2 NOTE: For APG Modbus programming instructions, please see MPI user manual. APG Modbus software can be downloaded from www.apgsensors.com/support.

4 General Care

Your level sensor is very low maintenance and will need little care as long as it was installed correctly. However, in general, you should periodically inspect your MPI unit to ensure the stem is free of any heavy buildup that might impede the movement of the float(s). If sediment or other foreign matter becomes trapped between the stem and float(s), detection errors can occur.

If you need to remove the float(s) from the stem of your MPI, be sure to note the orientation of the float(s) prior to removal. This will help ensure proper re-installation of the float(s).

Also, ensure that the housing cover is snugly secured. If the cover becomes damaged or is misplaced, order a replacement immediately.

DANGER: WARNING – POTENTIAL ELECTROSTATIC CHARGING HAZARD – CLEAN ONLY WITH A DAMP CLOTH.

AVERTISSEMENT – DANGER DE CHARGE ELECTROSTATIQUE POTENTIEL – NETTOYER SEULEMENT AVEC UN CHIFFON HUMIDE.

5 Repair Information

If your MPI level sensor needs repair, contact us via email, phone, or online chat on our website. We will issue you a Return Material Authorization (RMA) number with instructions.

• Phone: 888-525-7300
• Email: sales@apgsensors.com
• Online chat at www.apgsensors.com

6 IMPORTANT: All repairs and adjustments of the MPI level sensor must be made by the factory. Modifying, disassembling, or altering the MPI is strictly prohibited.

DANGER: OPEN CIRCUIT BEFORE REMOVING COVER or KEEP COVER TIGHT WHILE CIRCUITS ARE ALIVE.

AVERTISSEMENT – COUPER LE COURANT AVANT D'ENLEVER LE COUVERCLE, ou GARDER LE COUVERCLE FERME TANT QUE LES CIRCUITS SONT EN TENSION.

DANGER: WARNING – EXPLOSION HAZARD – SUBSTITUTION OF COMPONENTS MAY IMPAIR INTRINSIC SAFETY.

AVERTISSEMENT – RISQUE D'EXPLOSION – LA SUBSTITUTION DE COMPOSANT PEUT AMÉLIORER LA SÉCURITÉ INTRINSÈQUE.

DANGER: WARNING – EXPLOSION HAZARD – DO NOT DISCONNECT EQUIPMENT UNLESS POWER HAS BEEN SWITCHED OFF OR THE AREA IS KNOWN TO BE NON-HAZARDOUS.

AVERTISSEMENT – RISQUE D'EXPLOSION – AVANT DE DECONNECTER L'ÉQUIPEMENT, COUPER LE COURANT OU S'ASSURER QUE L'EMPLACEMENT EST DÉSIGNÉ NON DANGEREUX.

7 IMPORTANT: Only the combustion gas detection performance of the instrument has been tested.

8 IMPORTANT: MPI level sensor MUST be installed according to drawing 9005491 (Intrinsically Safe Installation Drawing for Hazardous Areas) in section 9 to meet listed approvals. Faulty installation will invalidate all safety approvals and ratings.

9 System level sensor needs repair, contact us via email, phone, or online chat on our website. We will issue you a Return Material Authorization (RMA) number with instructions.

• Phone: 888-525-7300
• Email: sales@apgsensors.com
• Online chat at www.apgsensors.com

10 USER MANUAL. APG Modbus software can be downloaded from www.apgsensors.com/support.

11 IMPORTANT: Refer to section 9 for Hazardous Location Wiring

12 NOTE: For APG Modbus programming instructions, please see MPI user manual. APG Modbus software can be downloaded from www.apgsensors.com/support.

13 General Care

Your level sensor is very low maintenance and will need little care as long as it was installed correctly. However, in general, you should periodically inspect your MPI unit to ensure the stem is free of any heavy buildup that might impede the movement of the float(s). If sediment or other foreign matter becomes trapped between the stem and float(s), detection errors can occur.

If you need to remove the float(s) from the stem of your MPI, be sure to note the orientation of the float(s) prior to removal. This will help ensure proper re-installation of the float(s).

Also, ensure that the housing cover is snugly secured. If the cover becomes damaged or is misplaced, order a replacement immediately.

DANGER: WARNING – POTENTIAL ELECTROSTATIC CHARGING HAZARD – CLEAN ONLY WITH A DAMP CLOTH.

AVERTISSEMENT – DANGER DE CHARGE ELECTROSTATIQUE POTENTIEL – NETTOYER SEULEMENT AVEC UN CHIFFON HUMIDE.
