The MPX Series API 18.2 Custody Transfer Magnetostrictive Level sensors provide the highly accurate and repeatable level and temperature readings necessary for oil storage and transfer from lease tanks. The MPX-R offers a 1”-diameter, stainless steel stem, while the MPX-T uses a 1”-diameter titanium stem for a larger range of chemical compatibility, including H₂S. All models come with required digital temperature sensors in the stem and feature robust floats that resist fouling and buildup.

**The Line-Up:**

**Online Data Portal**

The Tank Cloud data portal, located online at www.levelandflow.com, displays everything you need to know about your measurement.

Here you can:

- View your current and past readings,
- Manage alarms,
- Configure your sensors,
- and Setup user permissions for others in your organization.

Measurements are sorted by location and grouped into sites. Simply select the site you would like to view, and then choose the sensor. Current readings are prominent in the center of the screen.
