True Echo™ Dual Frequency Pulse Radar Level Transmitter For Solids
Series: PRS

The True Echo™ PRS Dual Frequency Pulse Radar Level Transmitter For Solids brings the unassailably accurate level readings of radar sensors to difficult to measure solids. Whether powders or pellets, grains or granules, the True Echo™ PRS’s dual frequencies to allow it to quickly and accurately read the complex reflections from piled solids. The True Echo™ also automatically adjusts signal power for optimal accuracy and clarity. With echo masking and damping factors programmable via software, getting dependable level readings from difficult materials is simple.
